Course Development: Literacy*Literacy Assessment and Instructional Strategies*

This course focuses on the fundamental link between literacy assessment and instruction. Topics include the purposes of various reading assessment tools, the selection of effective instructional strategies, and the essentials of comprehensive reading instruction. The course is designed to develop a more extensive understanding of assessment, evidenced-based teaching strategies, and the literacy processes of students.

Course Development: Middle Grades Education Specialization

Engaging Middle Level Learners

Provides teachers with effective methods to engage or re-engage middle level learners. Course focuses on specific instructional strategies, developmentally responsive approaches, successful content enhancements, enriched learning environments, and authentic learning.

Managing Middle Level Learners

Principles and practices for managing the interactions of middle level learners. Course focus is on proactive and positive management approaches that respond to the unique developmental characteristics of young adolescents and respect cultural differences.

Responsive Middle Level Programs

Prepares middle level teachers to plan and deliver an academically demanding and relevant curriculum for all middle level students. Course topics include current research on middle level programs, connecting theory and research with practice, and identifying promising practices.

Adolescent Development

Secondary teachers must develop a deep understanding of their young adolescent learners. Topics include young adolescents' well-being and healthy development; physical, social, emotional, intellectual development; and ways to foster student independence and responsibility.

Course Development: Teacher Education

Research Methods for Teacher Candidates

Provides teacher candidates with an introduction to action research. Course focuses on action research and its use in educational settings. Candidates develop a research proposal including identification of a research topic, review of the literature, and data collection methods.

Research and Issues in Indian Education

Provides teacher candidates with an introduction to action research in educational settings. Candidates develop an action research proposal including identification of a research issue and related question, review of the literature, and data collection methods.

Research Methods (with Susan Lenski)

Provides teacher candidates with an introduction to teacher research. Course focuses on action research and its use in educational settings. Candidates develop a research proposal including identification of a research question, review of the literature, and data collection methods.

Education Law

Addresses the various federal and state laws, rules, and regulations related to education. Course provides an overview of laws and rules that teachers need to follow in Oregon schools.

Educational Leadership, Teacher Research, and Change Agency (with Stephanie McBride)
